

ACTIVATION & ACCESS REMOTE CONTROL (AARC®)

REMOTE TECHNOLOGY INSTANT ENTRY/EXIT ACCESS

Parking facilities and other commercial properties can now provide efficient, affordable access for customers, residents and visitors. Featuring Bluetooth and app-based technology, parking and property access is easily afforded using iOS or Android devices – additional activation devices are not required.

Management of long-term and short-term parking, fleet and warehouse operations can be efficiently managed in real time via cell phone, online or cloud-based connectivity. With AARC® high-tech activation and access for Rytec high-performance doors has never been easier.

FEATURES

- Bluetooth activation
- Wireless loop activation
- Optional remote/encrypted key fob

SECURITY

- Selective access via authorized user list
- Easily add or delete users
- Single output for 'door open' or 'door not closed' message to cloud and email if outside preset time parameters
- For additional security 4G remotes are essentially 'disposable' for easy removal from authorized access user list

FUNCTIONALITY

- App-based Bluetooth activation from within 50 feet of door or 4G activation without distance limitations
- Activation by wireless vehicle detector/encrypted remote/phone app
- Access control managed and monitored through app-based, web-online and cloud-based access
- App/web-online/cloud-based user management

Unlimited user availability

Subscription not required for Bluetooth versions; subscription required for 4G version only
