Featuring the stylish design and structural integrity of the Spiral® high-performance door series, the Spiral VP offers a new combination of quality, value and performance in a lower speed, lower cycle design for light to moderate traffic.

Now, auto dealerships and other commercial settings can maintain a consistent aesthetic look - from front to back - without sacrificing high performance. The Spiral VP's small footprint allows the door to be installed almost anywhere a conventional overhead door fits - without visible attachment hardware. With sleek styling, quiet functioning and a compact profile, a consistent 360-degree customer experience is now a reality.

Spiral VP performance is guaranteed with a **5-year limited warranty**.

### Unparalleled Performance
- High performance operation for lower speed/cycle settings
- Day in, day out reliability

### Stylish Aesthetics
- Architecturally designed to complement the high-speed Spiral line of doors
- Crisp lines provide a stylish look ideal for new and existing auto dealerships and other commercial applications

### Proven Durability
- Constructed with heavy-duty, high quality components
