High Performance Doors for Self-Storage Facilities
**High Performance Doors for Self-Storage Facilities**

**Spiral®**
- Exclusive, patented technology
- Rigid aluminum double walled slats with integral rubber weatherseals
- Insulated, ventilated or vision slat options available
- Opening speed up to 60 inches per second

**Spiral® LH® (Low Headroom)**
- Low lintel design requires only 10 inches of headroom
- Rigid aluminum double walled slats with integral rubber weatherseals
- Insulated, ventilated or vision slat options available
- Opening speed up to 60 inches per second

**Spiral® HZ® (Hurricane Zone)**
- Missile impact tested and can withstand winds up to 175 mph
- Certified for compliance with Miami-Dade County and/or the Florida Building Code.*
- Opening speed up to 60 inches per second

**Spiral® FV® (Full Vision)**
- Full-width continuous window slats provide excellent visibility
- Sleek, high-tech aesthetics
- Shatter-proof and scratch resistant LEXAN™ slats
- Standard clear plus bronze and grey tinted options
- Opening speed up to 100 inches per second

**Spiral® LP® (Low Profile)**
- Low profile side column and low headroom configuration reduces clearances
- Rigid aluminum double-walled slats with integral rubber weatherseals
- Insulated, ventilated or vision slat options available
- Opening speed up to 36 inches per second

**Spiral® LH®-HZ® (Low Headroom, Hurricane Zone)**
- Missile impact tested and can withstand winds up to 175 mph
- Certified for compliance with Miami-Dade County and/or the Florida Building Code.*
- Low lintel design requires only 10 inches of headroom
- Opening speed up to 60 inches per second

---

**Rytec Spiral® vs. Conventional Doors**
- Rytec doors are extremely low maintenance compared to traditional conventional doors usually associated with regular high maintenance wear parts
- Rytec doors use a variable-speed drive operator instead of a standard DC brake motor and open at up to 60-100 inches per second compared to an average 6-10 inches per second for conventional doors
- Conventional doors usually run with continuous metal-to-metal contact shortening the lifespan of parts and the door; Rytec doors have no metal-to-metal contact providing a longer lifespan

---

*Notice of Acceptance (NOA) from Miami-Dade County, Florida NOA No. 23-0406-01 and/or Florida Building Product Approval FL# FL28502-R2*
**Patented Spiral® Technology**

Our Spiral Series doors offer a unique spiral track design that ensures no metal-to-metal contact for ultra-quiet operation. This also guards against wear and tear on the aluminum panel, resulting in minimal maintenance, preserved aesthetics and longer life.

**Safety Focused**

Rytec offers multiple standard and optional safety features to provide safeguards and assure operational standards.
- SmartSurround® Detection & Alert System
- Advanced³ Light Curtain Safety System
- Pathwatch®/Pathwatch II Safety Light Systems
- Reversing edge with Ry-Wi® Wireless System
- Dual thru-beam photo eyes

**Performance Under Control**

Our next generation exclusive System 4® and BTA4 remote door controllers provide greater functionality and unprecedented efficiency for Rytec doors. Featuring smart technology, easy installation and a standard NEMA 4X rated (or equivalent) enclosure.

**Improved Security**

- Rapid opening and closing prohibits unauthorized access and deters ‘tailgating’ or ‘piggybacking’ activity
- Rytec SmartSurround® with motion detection can discourage pedestrian loitering by flashing LED lights
- Rigid panel slats and frame provide secure closure and LEXAN vision slats can provide visibility with scratch and shatter-resistance

**Stylish Aesthetics**

- Modern, crisp lines and materials coordinate with many types of architectural styles of self-storage facilities
- Variety of RAL classic or custom match colors and additional options to help fit brand guidelines
- Whether new construction or re-purposed older buildings, variety of models available for specific needs

**Reduced Maintenance Costs**

- Specifically engineered for high-traffic, high-cycle environments, designed for day in, and day out use
- Assured operation without extensive ongoing maintenance
- Heavy-duty, durable components and construction

**Lasting Reliability**

- Engineered to withstand the daily rigors of use and last for millions of operating cycles
- High-speed operation assures smooth, efficient, high-volume traffic flow and reduced wait times
- Custom manufactured for optimal fit and performance
North America's Leading Independent High Performance Door Manufacturer

Rytec doors offer our customers the highest value and day in, day out performance — and are supported by the knowledge and expertise of dedicated employees, authorized dealers and trained installers across North America. With over 150,000 doors in operation — many with millions of operating cycles — our doors provide energy savings, safety and security and require only minimal maintenance.
