

HANDS-ON TRAINING WITH A DOOR EXPERT

In-person, à la carte training program for servicing and maintenance of Rytec high-performance door models. Held at our facility in our Tech Center, it offers hands-on learning with multiple door models.

Designed for our customers, dealers, installers and contractors to customize their own learning plan for their teams' specific needs that will help them learn proper techniques and procedures.

The custom tailored course is led by expert trainers and experienced door professionals. Upon successful completion of each course, a certificate of completion is issued to each student.

Training session may include the follow:

- ▶ Industry door terminology
- ▶ Controller programming, parameters and error codes
- ▶ Electrical and mechanical troubleshooting
- ▶ Motor brakes, bottom bars, activations, photo eyes, etc.
- ▶ Cold Storage Applications
- ▶ Preventative maintenance and more
