Rytec Opens Doors for New Car Customers
The Audi Pacific dealership in Torrance California is Audi of America's largest showroom in the United States. The award-winning dealership follows the new Audi “terminal” design with bold signage and an open two-story showroom, as well as 22 service bays. To ensure energy efficiency and provide an impressive architectural statement, architects specified Rytec doors throughout the 45,000 square foot LEED Gold facility.

Key Facts
Company
Audi Pacific

Location
Torrance California

Challenge
Energy and maintenance costs
LEED certification standards
Architectural statement

Solution
Spiral® FV® High-Speed Doors

“Through the opening of Audi Pacific, we not only celebrate the largest Audi showroom in the United States, but also take great pride in achieving LEED Gold certification.”

Mike Cagle
Director, Western Region
Audi of America

High Efficiency and High Design LEED to Customers
LEED (Leadership in Energy and Environmental Design) is an internationally recognized green building certification process promoted by the U.S. Green Building Council to assess the sustainability of a building's design, construction and operations. To meet LEED Gold certification, the Audi Pacific dealership features Rytec high-performance doors, energy efficient water fixtures, low energy use lighting and a 45 kilowatt (kW) DC Solar PV system.
