

Enhancing Style and Design

HIGH-PERFORMANCE DOORS

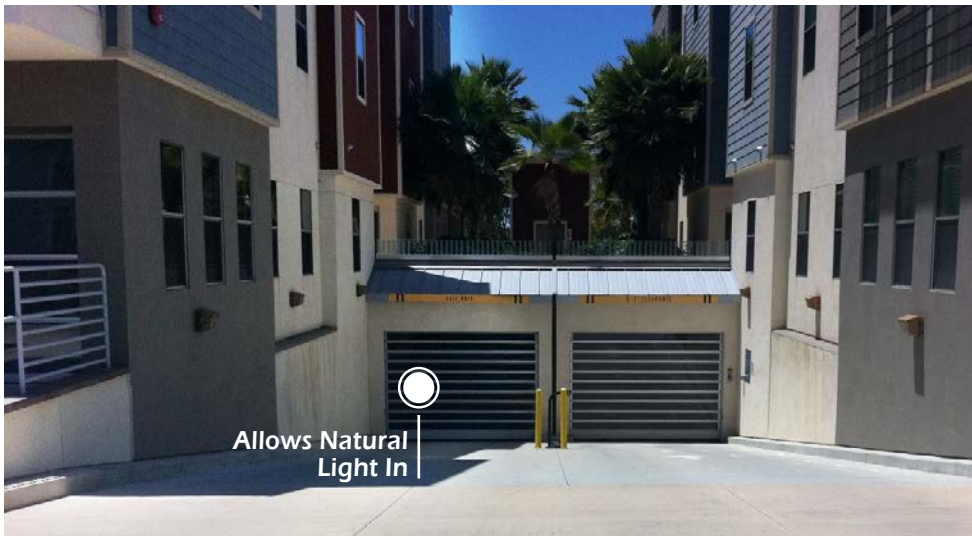

APARTMENT, CONDO & LOFT LIFE

High-Performance for High Living

- Fast open and close action reduces unauthorized tailgating and increases resident and visitor safety
- Ultra-quiet operation for building and resident comfort
- Variable speed preferences help manage traffic flow
- Tight seals and rugged slat design help reduce energy costs
- Quality, durable materials reduce maintenance costs
- Heavy-duty material construction yet with architectural appeal to fit almost any building style
- Low headroom and clearance models for retrofit or limited space installations

9-inch
Ventilation Slats

Maintain Privacy

FORM WITH FUNCTION

Ventilated Slats

- Ensure air flow and circulation without large debris entry
- Provide visibility that can still maintain privacy
- Rigid construction maintains a highly secure environment
- Mix style and function with ventilated and solid slats
- Custom RAL colors provide an architectural complement, accent or emphasis

Edge-to-Edge
Protection

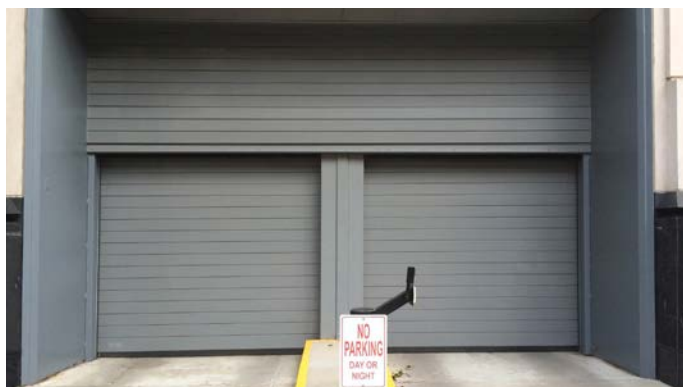

Coordinated with
Surrounding Aesthetics

FABRIC ALTERNATIVES For a Variety of Applications

- Maintain separate environments and access points
- High-speed and reliable performance
- Fabric models can be hit, reset and back in operation within minutes
- Softer visual appeal

MORE THAN JUST A DOOR

Seamless Transitions

- Slats incorporated into building design elevates architectural styling
- Extends perceived size of opening both height and width wise

RYTEC HIGH-PERFORMANCE DOORS

With 150,000 doors in operation worldwide, Rytec is North America's leading manufacturer of innovative high-performance doors for industrial, commercial, retail auto, food and beverage, and controlled-temperature environments. Every door addresses a specific operational/environmental challenge and is custom-engineered for maximum safety, productivity and efficiency. Corporate offices are headquartered in Jackson, WI, with additional manufacturing operations in Hartford, WI. Customer support is provided through national and regional offices and a network of local dealers and installers throughout North America.
